

ETWINNING PROJECT IDEA

READ ME AND PASS ME ON

Books you have already read can be offered to your friends or colleagues.

Sustainable rereading of books someone else would appreciate and read them.

Ecological attitude about printing new books.

Helping the others who wouldn't be able to allow to buy new books.

Support of language skills and reading literacy.

Sharing books and building social contacts and discussing about books.

Writing novels, stories, poems, creating interactive book.

Description

The aim of this project is to share books we have already read and we are not going to keep at home. Students and teachers would be bringing books to school once in two weeks at certain time to the school library. It would work on a swap principle, e.g., if someone brings a book, he/she can take another one. This book can be kept or swap again next time.

Students will organise a list of books, books will be recorded with a specific number for tracing the book. The project will start in September 2024 and would last till June 2025. In the end of a school year students would make an output about topics and books students are the most interested in.

Students will also take part in a literature competition to realise how difficult it is to write literature. They will write their own stories, novels or poems (max 1500 characters). Chosen work from each participating school during all school year will be continuously including into interactive book created by students, so anybody can read it.
